	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Sort dining halls by most amount of nutrient dense foods at a given time ● Allow user to input allergies/intolerances to blacklist certain foods ● Allow user to prioritize certain nutrients	**Schedule - (For V2.0+)** ● Create a meal plan by user request for a selected dining hall to maximize nutrients ● The user can set a diet plan with certain calorie requirements, and the program can create a day of dining hall meals based on that ● Allow user to create meal preferences, including certain foods even if they are not necessarily nutritionally efficient.
Not Important	**Delegate - (Use a library)** ● Let the user track their meals and nutrition values over time ● Create a graph of consumed nutrients/days that you hit nutrient goals ● Make nice-looking UI for user experience	**Delete - (Cut it)** ● Allow the user to upload a picture of their meal for self-accountability purposes ● Social/messaging aspect where you can schedule days to go to the dining hall with others ● Include menus of off-campus foods
